SUMMARY

Full stack software Engineer years of experience specializing in developing automated systems and dynamic web applications. Experienced in optimizing user interfaces, database management, and automated document generation to improve user satisfaction and system reliability. Focused on leveraging advanced technologies and agile methodologies to drive innovation and deliver scalable solutions.

EXPERIENCE

Software Engineer

Corpso

March 2024 - Present, Malaysia

- Maintain and enhance in-house web applications, company website, and member portal used for daily business operations.
- Designed and implemented workflow automation to reduce manual processes and improve operational efficiency.
- Led UI/UX improvements based on user feedback, increasing usability and reducing user-reported issues.
- Managed company infrastructure, including deployment, hosting, and email systems.
- Integrated internal systems with third-party software such as accounting and taxation platforms.
- Advised management on technology adoption to improve productivity and system scalability.

Software Engineer Intern

AllSolve Technologies

September 2023 - February 2024

- Contributed to multiple production projects by developing new features, enhancing existing functionality, and resolving defects.
- Improved user experience by refining UI components and optimizing workflows.
- Diagnosed and fixed bugs to ensure system stability and reliability.
- Collaborated with senior engineers to design and implement new features aligned with evolving business requirements.

Freelancing

- Delivered tailored project solutions that improved client satisfaction and ensured timely completion with high-quality standards.
- Implemented efficient workflows to optimize task execution, resulting in increased productivity and smoother project delivery.
- Collaborated with clients to clarify requirements, enhancing communication and aligning final outputs with business objectives.
- Monitored project progress to maintain compliance with deadlines and specifications, minimizing rework and delays.
- Adapted technical skills to diverse project demands, supporting seamless integration and functionality across various platforms.

EDUCATION

Computer Science (Software Engineer)

University of Technology Malaysia • 2024

SKILLS

Languages: JavaScript, TypeScript, Python, Java, Go | **Databases:** MySQL, PostgreSQL, MongoDB, Prisma

Frameworks: React, Next.js, Angular, NestJS, ASP.NET, Odoo | **Mobile:** Flutter, React Native

Cloud & DevOps: Docker, DigitalOcean, Firebase, Vercel | **Tools & Workflow:** GitHub, Jira, Agile, Slack
